EXPERIENCE

SMAL GMBH | Frontend Developer
Oct 2021 - Present | Munich

- Engineered a Next.js e-commerce platform, achieving a 90+ Lighthouse score by leveraging server-side rendering (SSR) and static site generation (SSG), leading to enhanced search engine optimization (SEO) and accessibility (a11y).
- Integrated RESTful & GraphQL APIs, enhancing data fetching efficiency and improving user experience with real-time updates.
- Implemented a Next.js & TypeScript website with Contentful CMS, Tailwind, and SCSS, optimizing scalability and performance.
- Collaborated with designers to ensure responsive, pixel-perfect UIs.
  Key projects and contributions:
  - **Elgato**: Implemented Cloudinary, reducing media bandwidth by 70%. Led accessibility audits and improved WCAG compliance, achieving 90+ Lighthouse score. Set up GTM dataLayer tracking for robust analytics. Tech stacks: NextJS, TS, Contentful, SCSS, Cloudinary, Jasper
  - **Corsair**: Built and optimized 10+ high-converting landing pages using Twig, Alpine.js, and SCSS, contributing to improved engagement and performance.
  - **Vodafone**: Identified and resolved accessibility (WCAG) issues in the router dashboard UI, improving usability for screen reader users and keyboard navigation. Tech stack: VueJS
  - **Playboy Premium**: Implemented navigation and model gallery features improving content discoverability and performance. Tech stacks: Angular, Drupal

DYNAMAZE UG | Frontend Developer Intern
May 2021 – Jul 2021 | Köln

- Supported frontend development using Nuxt.js and Vue.js, contributing to the creation of dynamic componenets, high-performance web applications.
- Worked with senior developers to integrate APIs and refine the homepage UI. interfaces.

WO-BE SYSTEMS GMBH | Frontend Developer Intern
Nov 2020 – Apr 2021 | Kiel

- Contributed to frontend development tasks and collaborated with the team on web application projects.
- Blended visualizations seamlessly into Titan's existing web application, enhancing the user's ability to monitor and interact with real-time data.
- Conducted in-depth research on monitoring and visualization techniques within Titan, an open-source Industrial DevOps platform.
